ENHANCED PRECAUTIONS AGAINST NOVEL CORONAVIRUS (COVID-19)

The Greater Hartford Transit District (the “District”) wishes to assure the public, passengers, and employees alike, that appropriate precautions are underway in response to inquiries about the novel coronavirus (COVID-19). COVID-19 was first detected in Wuhan, China and subsequently diagnosed in several other countries and territories, including the United States. As of this writing, the CDC’s scientific testing and surveillance supports that the health risk of coronavirus remains low to the general public. Across the country information about COVID-19, including confirmed cases of diagnosis, is developing by the day. Please visit https://www.cdc.gov/coronavirus/index.html for the latest information and updates.

HOW CAN YOU PROTECT YOURSELF AND YOUR FAMILY?

• Frequent hand washing, using soap, for at least 20 seconds.

• Use hand sanitizers when soap and water are unavailable.

• Avoid touching eyes, nose, or mouth with unwashed hands.

• Cough and sneeze into your elbow, not your hand. Alternatively, cough or sneeze into a disposable tissue, then throw the tissue into the trash, and wash your hands.

• Stay home when feeling sick and avoid close contact with people who are sick.
